Energy	NJSLS - Science: TItle Performance Expectations • 4-PS3-1. Use evidence to construct an explanation relating the speed of an object to the energy of that object. [Assessment Boundary: Assessment does not include quantitative measures of changes in the speed of an object or on any		Recommended Activ Interdisciplinary Conn Experiences to Explore	ections, and/or Student		

Dev. Date: Established 2016-2017 Revised 2018-2019 Revised 2019-2020 Revised 2020-2021 Revised 2021-2022 **Revised 2022-2023**

of energy.]

- 4-PS3-3. Ask questions and predict outcomes about the changes in energy that occur when objects collide.

 [Clarification Statement:
 Emphasis is on the change of energy due to the change in speed, not on the forces, as objects interact.]

 [Assessment Boundary:
 Assessment does not include quantitative measurements of energy.]
- 4-PS3-4. Apply scientific ideas to design, test, and refine a device that converts energy from one form to another. *[Clarification Statement: Examples of devices could include electric circuits that convert electrical energy into motion energy of a vehicle, light, or sound; and, a passive solar heater that converts light into heat. Examples of constraints could include the materials, cost, or time to

	design the device.] [Assessment Boundary: Devices should be limited to those that convert motion energy to electric energy or use stored energy to cause motion or produce light or sound.]	
FOUNDATION Disciplinary: Core Idea	FOUNDATION Disciplinary: Statement	
 PS3.A: Definitions of Energy PS3.B: Conservation of Energy and Energy Transfer PS3.C: Relationship Between Energy and Forces PS3.D: Energy in Chemical Processes and Everyday Life ETS1.A: Defining Engineering Problems 	 The faster a given object is moving, the more energy it possesses. (4-PS3-1) Energy can be moved from place to place by moving objects or through sound, light, or electric currents. (4-PS3-2), (4-PS3-3) Energy is present whenever there are moving objects, sound, light, or heat. When objects collide, energy can be transferred from one object to another, thereby changing their motion. In such collisions, some energy is typically also transferred 	 Essential Question/s: What is energy? How is energy transferred? How do collisions show energy? Activity Description: You Solve It-Crash Course (Online Simulation) [SCI, 21st Century, TECH, PE] Hands-On Activity- Light the Bulb (Pages 78-82) [SCI, SEL, 21st Century, PE, ELA] Hands-On Activity- Design and Test a Solar Cooker (Pages 95-101 [SCI, SEL, 21st Century, TECH, PE, ELA] Hands-On Activity- Test It! Stored Energy in a Spring (Pages 125-127) [SCI, SEL, 21st Century, PE, MA, ELA] Lego We Do 2.0- Pulling [SCI, SEL, 21st Century, TECH, PE] Lego We Do 2.0- Speed [SCI, SEL, 21st Century, TECH, PE] Unit Project- Truck Pull [SCI, SEL, 21st Century, TECH, PE, MA, ELA]

Dev. Date: Established 2016-2017 Revised 2018-2019 Revised 2019-2020 Revised 2020-2021 Revised 2021-2022 Revised 2022-2023

- to the surrounding air; as a result, the air gets heated and sound is produced. (4-PS3-2),(4-PS3-3)
- Light also transfers energy from place to place.(4-PS3-2)
- Energy can also be transferred from place to place by electric currents, which can then be used locally to produce motion, sound, heat, or light. The currents may have been produced to begin with by transforming the energy of motion into electrical energy. (4-PS3-2),(4-PS3-4)
- When objects collide, the contact forces transfer energy so as to change the objects' motions. (4-PS3-3)
- The expression "produce energy" typically refers to the conversion of stored energy into a desired form for practical use. (4-PS3-4)
- Possible solutions to a problem are limited by

• Scientist Spotlight- Guion Bluford, Victor J. Glover, Jr., and Mae C. Jemison [SCI, 21st Century]

Interdisciplinary Connections: Content: NJSLS:

Connections to NJSLS - English Language Arts

- **RI.4.1** Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text. (4-PS3-1)
- **RI.4.3** Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text. (4-PS3-1)
- **RI.4.9** Integrate information from two texts on the same topic in order to write or speak about the subject knowledgeably. (4-PS3-1)
- W.4.2 Write informative/explanatory texts to examine a topic and convey ideas and information clearly. (4- PS3-1)
- W.4.7 Conduct short research projects that build knowledge through investigation of different aspects of a topic. (4-PS3-2), (4-PS3-3), (4-PS3-4)
- W.4.8 Recall relevant information from experiences or gather relevant information from print and digital sources; take notes and categorize information and provide a list of sources. (4-PS3-1), (4-PS3-2), (4-PS3-3), (4-PS3-4)
- W.4.9 Draw evidence from literary or informational texts to support analysis, reflection, and research. (4- PS3-1)
- **4.OA.A.3** Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using

	available materials and resources (constraints). The success of a designed solution is determined by considering the desired features of a solution (criteria). Different proposals for solutions can be compared on the basis of how well each one meets the specified criteria for success or how well each takes the constraints into account. (secondary to 4-PS3-4)	equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding. (4-PS3-4)

	Disciplinary Concept:	
NJSLS CAREER READINESS, LIFE LITERACIES & KEY SKILLS	Core Ideas:	 Collaboration with individuals with diverse perspectives can result in new ways of thinking and/or innovative solutions. Curiosity and a willingness to try new ideas (intellectual risk-taking) contributes to the development of creativity and innovation skills. The ability to solve problems effectively begins with gathering data, seeking resources, and applying critical thinking skills.
	Performance Expectation/s:	 9.4.5.CI.1: Use appropriate communication technologies to collaborate with individuals with diverse perspectives about a local and/or global climate change issue and deliberate about possible solutions (e.g., W.4.6, 3.MD.B.3,7.1.NM.IPERS.6). 9.4.5.CI.2: Investigate a persistent local or global issue, such as climate

change, and collaborate with individuals with diverse perspectives to improve upon current actions designed to address the issue (e.g., 6.3.5.CivicsPD.3, W.5.7). • 9.4.5.CI.3: Participate in a brainstorming session with individuals with diverse perspectives to expand one's thinking about a topic of curiosity (e.g., 8.2.5.ED.2, 1.5.5.CR1a). • 9.4.5.CI.4: Research the development process of a product and identify the role of failure as a part of the creative process (e.g., W.4.7, 8.2.5.ED.6). • 9.4.5.CT.1: Identify and gather relevant data that will aid in the problem-solving process (e.g., 2.1.5.EH.4, 4-ESS3-1, 6.3.5.CivicsPD.2). • 9.4.5.CT.2: Identify a problem and list the types of individuals and resources (e.g., school, community agencies, governmental, online) that can aid in solving the problem (e.g., 2.1.5.CHSS.1, 4-ESS3-1). • 9.4.5.CT.3: Describe how digital tools and technology may be used to solve problems. • 9.4.5.CT.4: Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global (e.g., 6.1.5.Civics CM.3).
Career Readiness, Life Literacies, & Key Skills Practices
 Hands-on activities provide opportunities for creativity and innovation. Working in small groups will allow students to collaborate with classmates who possess diverse perspectives for innovative solutions. Also, collaboration will enhance their ability to gather data, discover resources, and apply critical thinking skills to solve real-world problems.
