HAZARDOUS SUBSTANCES

7433 HAZARDOUS SUBSTANCES

The Board of Education will enforce the law governing hazardous substances in the school district. Employees of this district shall be informed of the hazards related to the handling of certain substances and trained to work with hazardous substances.

The Superintendent may delegate authority for the maintenance of hazardous substances and for the development of safety and training standards for the handling of such substances to a safety officer.

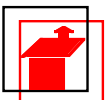

The Superintendent shall conduct periodic audits of hazardous substances in use in the district, ascertain that such substances are being handled in accordance with appropriate safety requirements, and determine that the employees who are required to handle hazardous substances are properly equipped to do so.

The Superintendent shall be cognizant of all hazardous substances in use in the district, the purpose of each, and the precautions required for each. The Superintendent shall take such action as may be necessary and feasible to minimize the use of hazardous substances in the district.

The Superintendent shall report periodically to the Board on hazardous substances in district use and the purpose of each.
