Dear Parents/Guardians of students entering Grade 7 in September 2024,

This summer, your child will continue to build a strong foundation in mathematics using ST Math. It is strongly recommended that students complete the Summer Bridges Assignment to prevent summer learning loss and to improve their efficiency and accuracy with multiplication and division facts. **He or she will also have the opportunity to earn ten extra credit points on the first mathematics test of the 2024-2025 school year.**

The Multiplication and Division Facts Objective has been assigned to your child in ST Math. In this Objective, students will review multiplication and division facts to 20 using visual representations to model problems. The objective can be found by clicking on the house icon on the ST Math landing screen:

**Students will have from June 12, 2024 until August 30, 2024 to complete the Multiplication and Division Facts Objective.**

Completion of the objective may take a total of 300 minutes of play. Breaking the time into sessions of 15 to 30 minutes is recommended. Once the objective is completed, please provide your student's 2024-2025 math teacher with your completion verification (located on the next page). Scrap paper will not be required to be handed in this year.

Your child can continue to access ST Math through Clever, found on the BBOED website, under the Students tab. All students who were registered in school up to June 20, 2024, will continue to have access to their online math platforms throughout the summer. Students new to the district will have access to their online accounts after the first week of September. **Please make sure your child is logged in before he or she starts to work, otherwise, his or her progress will not be saved nor will his or her new teacher be able to view it in September.**
