## **1.0 INTRODUCTION**

McCabe Environmental Services, L.L.C. (McCabe) was retained by Bayonne Board of Education (Client) to conduct lead in drinking water testing at William Shermin Community School.

The project information is as follows:

<u>Client Name:</u>	Bayonne Board of Education
<u>Contact Person:</u>	Mr. Daniel Castles
<u>Project Name:</u>	Rich Korpi Ice Rink Lead in Drinking Water
<u>Project Location:</u>	W 28th Street, Bayonne, NJ 07002
<u>Date(s) of Service:</u>	09/02/22
<u>McCabe Personnel:</u>	Gerard D'Alessio

## **2.0 SCOPE OF WORK**

Drinking water testing was performed at Rich Korpi Ice Rink located at W 28th Street, Bayonne, NJ on September 2, 2022. The purpose of the testing was to determine if the building's plumbing was having an adverse impact on water quality, specifically with regard to lead concentrations. Samples were collected from various potential drinking water outlets located throughout the building.

## **3.0 PROCEDURES**

After determining which outlets would be sampled, McCabe personnel collected a "first draw" sample at each location. A "first draw" is the initial water that is first to come out of the tap after a period of inactivity. Following the "first draw", a "30 second flush" sample was also collected where the main service line comes into the building. All samples were collected into 250 mL sterile bottles, labeled with a sample identification, and analyzed in accordance with EPA approved methods to determine the level of lead in drinking water. Samples were analyzed by an accredited laboratory.

The U.S. Environmental Protection Agency (EPA) has established National Primary Drinking Water Regulations (NPDWR) that set mandatory water quality standards for drinking water contaminants. These are enforceable standards called "maximum contaminant levels" or "MCL", which are established to protect the public against consumption of drinking water contaminants that present a risk to human health. An MCL is the maximum allowable amount of a contaminant in drinking water which is delivered to the consumer.

The EPA has established the Lead and Copper Rule that sets standards for state and public water systems. This rule has set an MCL for lead at 15 parts per billion (ppb) for a one liter sample. However, the EPA also established the Lead in Drinking Water at Schools and Child Care Facilities in which the EPA recommends an MCL of 20 ppb for a 250 milliliter first draw sample. In order to be more stringent, for our report purposes we have compared all results to both the 15 ppb and the 20 ppb standards.

#### **4.0     TABLE OF SAMPLE RESULTS**

The following table presents all sample results in order of sample identification:

<b>Sample ID</b>	<b>Sample Location</b>	<b>Lead Result</b>	<b>Exceeds (MCL 15 ppb)</b>	<b>Exceeds (MCL 20 ppb)</b>
IR-01	First Draw – Chiller Outside Men/Women Bathroom	6	Pass	Pass
IR-02	30 Second Flush – Chiller Outside Men/Women Bathroom	6.3	Pass	Pass
IR-03	First Draw – Chiller Outside Gym	< 0.5	Pass	Pass
IR-04	First Draw – Kitchen Sink	0.5	Pass	Pass

#### **5.0     DISCUSSION AND CONCLUSION**

A total of four (4) samples were collected from Rich Korpi Ice Rink. All samples were found to be less than the EPA Lead in Drinking Water at Schools and Child Care Facilities standard of 20 ppb, as well as the EPA Lead and Copper Rule standard of 15 ppb.

In addition, McCabe Environmental recommends annual drinking water sampling to ensure that the building's plumbing is not having an adverse impact on water quality.

**APPENDIX A**

ATTACHMENTS**

### Attachment A - List of Priority for Sampling

SCHOOL NAME	DATE OF SAMPLING	CERTIFIED LABORATORY	NOTES
Rich Korpi Ice Rink	09/02/22	Phoenix Environmental Laboratories Inc.	

## Attachment B – Plumbing Profile

**Note:** Complete for each school. For additional information see the USEPA publication, "The 3Ts for Reducing Lead in Drinking Water in Schools"

Name of School: Bayonne HS Ice Rink Grade Levels: 9-12

Address: 669 Ave. A, Bayonne, NJ 07002

Individual school project officer Signature: *Scott McLean* Date: August 2002

Questions	Answers
<b>Background Information</b>	
1. What year was the original building constructed? Were any buildings or additions added to the original facility?	Grade 9-12 Built in 1986
2. If the building was constructed or repaired after 1986, was lead-free plumbing and solder utilized? What type of solder was used? Document all locations where lead solder was used.	Any repairs made after 1986 were done using lead free solder
3. Where are the most recent plumbing repairs and replacements?	<div style="display: flex;"> <div style="flex: 1;">Location:</div> <div style="flex: 1;">Description:</div> </div>
4. With what materials is the service connection (the pipe that carries water to the school from the public water system's main in the street) made? Where is the Service Line located? (This is the POE location.)	<div style="display: flex;"> <div style="flex: 1;">Material: Ice Rink Duct Iron</div> <div style="flex: 1;">Location: The water main (roadway between ice rink and annex) enters the 1st floor enters the 1st floor where the water meter is located and continues to the remainder of the building</div> </div>
5. Is there point of entry (POE) or point of use (POU) treatment in use?	<div style="display: flex;"> <div style="flex: 1;">Y / N No treatment of water Type: at POE</div> <div style="flex: 1;">Location: ice rink 1986</div> </div>
	City water comes treated

Questions	Answers
6. Are there tanks in your plumbing system (pressure tanks, gravity storage tanks)?	Y / N Yes Building has two 100 gallon hot water storage tank located in 2nd floor mechanical room Building has a 75 gallon hot water storage tank located in Zamboni garage
7. Does the school have a filter maintenance and operation program? If so, who is responsible for this program? What is the process for adding filters?	Yes, Scott Nolan, Andy McCabe, Vinny Caiola, change filters on an as needed basis assign plumbers
8. Have accessible screens or aerators on outlets that provide drinking water been cleaned? Does the school have a screen or aerator maintenance program?	Y / N Yes The district has set-up a routine maintenance program to clean screens
9. Have there been any complaints about bad (metallic) taste? Note location(s).	Y / N NO Location:
10. Review records and consult with the public water supplier to determine whether any water samples have been taken in the building for any contaminants. If so, identify: <ul style="list-style-type: none"> <li>• Name of contaminant(s)</li> <li>• Concentrations found</li> <li>• pH level</li> </ul> Is testing done regularly at the building?	No indoor testing by public water supplier
11. Other plumbing background questions include: <ul style="list-style-type: none"> <li>• Are blueprints of the building available?</li> <li>• Are there known plumbing "dead-ends", low use areas, existing leaks or other "problem areas"?</li> </ul> Are renovations planned for any of the plumbing system?	Not all prints are available No dead-end low use areas All leaks were identified during walk through and have been repaired No plumbing system renovations planned

Questions	Answers
<b>Walk-Through</b> <i>These questions should be addressed during the walk-through of the facility, while Attachment C- Drinking Water Outlet Inventory is being completed.</i>	
1. Confirm the material of Service Line visually.	Duct iron
2. Confirm the presence of POE or POU treatment.	No POE or POU treatment
3. What are the potable water pipes made of in your facility? <ul style="list-style-type: none"><li>• Lead</li><li>• Plastic</li><li>• Galvanized Metal</li><li>• Cast Iron</li><li>• Copper</li><li>• Other</li></ul> Note the water flow through the building and the areas that receive water first, and which areas receive water last.	Copper  Water flow through the building shown on prints
4. Are electrical wires grounded to Water Pipes? Note location(s).	Y / N  No  No electrical wires grounded to water pipes
5. Are brass fittings, faucets, or valves used in your drinking water system? Note that most faucets are brass on the inside. Document the locations of any brass water outlet to be sampled.	Location: Complete in "Brass" Column in Attachment C- Water Outlet Inventory. Yes Completed in Attachment C - Water Outlet Inventory
6. Locate all drinking water outlets (i.e. water coolers, bubblers, ice machines, kitchen/ food prep sinks, etc.) in the facility.	Complete in Attachment C-Water Outlet Inventory.

Questions	Answers
7. Have the brands and models of the water coolers in the school been compared to the list of recalled water coolers in the Toolkit?	Y / N Yes all water coolers have been checked and compared to the list of recalled water coolers
Recalled Drinking Water Fountains	Type None on the list of recalled water coolers
Make and Model	Complete in "Signs of Corrosion" column in Attachment C- Drinking Water Outlet Inventory.
8. Have signs of corrosion, such as frequent leaks, rust-colored water, or stained fixtures, dishes, or laundry been detected? Note the locations of water outlets.	Y / N
9. Are there any outlets that are not operational and therefore out of service? Permanently? Temporarily?	Complete "Operational Column" in Attachment C- Drinking Water Outlet Inventory.
Permanently	Type/ Location
Temporarily	Description

## Attachment C – Drinking Water Outlet Inventory
